Dr Abhishek Asthana, Director of Industrial Energy Pioneers (IEP), helped us get grant funding from the government's Industrial Energy Transformation Fund (IETF) to carry out a detailed techno-economic feasibility study of energy efficiency at our Rotherham SteelPhalt site. His team of expert energy engineers helped us identify the largest energy savings under challenging operational constraints. They supported us fully throughout our journey, managing the project and grant claims, and making the whole experience extremely smooth and simple.

It was a pleasure working with Abhishek and his team. For my first government-based project, it was definitely an eye opener, and I really appreciated that he took the lead and the time to explain everything when I was unsure. It was a really good experience.

I highly recommend them for energy efficiency and decarbonisation projects.
