Recommendation Letter for IEP

11 February 2025

I am pleased to provide this letter of recommendation for Industrial Energy Pioneers (IEP) in recognition of their outstanding work in conducting an energy efficiency feasibility study for Ultra Tough.

IEP's team demonstrated exceptional professionalism and expertise throughout the entire study. They successfully secured a substantial grant from the Industrial Energy Transformation Fund, which made a major contribution to the costs of the study. This achievement alone underscored their capability in navigating complex funding mechanisms and securing financial support for energy efficiency projects.

Furthermore, the study was executed on time and within budget, reflecting IEP's commitment to efficiency and financial discipline. Their thorough analysis and insightful recommendations were instrumental in guiding our Board in making informed decisions about the company's future energy strategy.

Given our experience with IEP, I have no hesitation in recommending them to other organisations seeking expert guidance in energy efficiency studies and grant funding opportunities. Their professionalism, technical proficiency, and reliability make them a valuable partner in such initiatives.

Should you require any further information, please do not hesitate to contact me.
